

Vanity Magazine 1.0 Documentation

Documentation Prepared for AlohaThemes.com Customers.
Have “good” karma. Please use only if you purchased a theme from [our site](#).

Vanity is a fresh WordPress theme with a magazine layout style.

Intended for use on Celebrity-Fashion-Gossip sites or through customization and functions modifications it can be used in any kind of website.

Images on Home Page

To specify the size for the thumbnails, go to Settings ---> Media and specify the size (Recommended Maximum of 400px width)

Plugins Required

Vanity requires to be installed with the following plugins in order to work as seen on the demo page. (All these plugins are provided in the zip file under the “plugins” folder)

- Sociable
- WP ☐ MostCommentedPosts ☐ Credits: ja.rafi.pl

This plugin shows the post with most comments in the sidebar single posts.

- WP ☐ Polls ☐ Credits: lesterchan.net/wordpress

This plugin adds poll functionality to the front page layout with several customization options from the Admin section.

*These plugins are not developed by Gorillathemes.com and are property of their respective authors, Gorillathemes.com will not take any responsibility for future plugin functionality and updates and each plugin has its own distribution license set by their developers.

Vanity Installation

1. Unzip the file.
2. Upload the Vanity folder to your WordPress wp-content/themes folder
3. Open the plugins folder and upload the contents of the entire folder to wp-content/plugins in your WordPress installation.

4. Login into your WordPress admin and go to Design options menu
5. Click on "Appearance"
6. Click on the Vanity Screenshot to activate the theme.

Vanity Theme Options

1. Login into your WordPress admin and go to "Appearance" link
2. Click on Themes options

Stylesheet selector

Vanity comes loaded with an stylesheet selector, for demo purposes we've included this sample styles:

- Salmon & Cream
- Aqua & Grey

All the styles are located under vanity theme folder, if you want to add more styles, just copy the files to that folder and they will show up in the Vanity Theme Options stylesheet selector.

Carousel Article Slider Setup

Select a category (previously created) for the Carousel and the posts will show up with their thumbnails resized, title and excerpt.

Feedburner Integration

Enter your feedburner id or sign up for a new account at <http://www.feedburner.com> if you don't have one.

This will allow visitors to enter their e-mail address and subscribe to your newsletter, every time you posts and new article and e-mail with the actual post will be delivered to their inbox.

flickr integration

Enter your flickr Id to publish your photos in the site or get any flickr id using <http://idgettr.com/>, you have the option to display from 1 to 9 photos in different formats (square recommended for optimal layout).

Vanity Video Management.

Display any video from YouTube, Metacafe, Revver, Dailymotion, etc.
Just copy the embed (share) code from one of the video networking sites and paste it in the text area box.

The theme has a random function feature that will display any of the 5 videos everytime a user visits the site.

Banner Advertisement Management

Now you can monetize you website easily trough the Vanity Banner Management.

You can enable all banners or turn on/off each of them individually.
Just copy and paste the image url of your banner image and fill in the url information with the appropriate link.

The top header banner and the bottom right sidebar banner allows you to put your Adsense code to publish Google advertisement on your site.
